

Typhoon Graphics

The newest, most radical Vehicle Graphics CD Collection around! When the Sport Import kids come calling with their Hondas, Mitsubishi's and Acuras asking you for something wild, don't turn them away! Typhoon Graphics has 100 original designs that will blow them away! Designed with Import Tuner Cars in mind, these graphics are unlike anything else on the market today. Some of the graphics are applicable to any vehicle type, the flames and tribal being classis examples, but so are many of the others. Each graphic is smoothly designed, perfectly cuttable and very clean. The file format is Adobe Illustrator, and will import into all design software. The streets will never be the same....
