# PRISMJET™

## PET Pop Up Film

Our newest addition to the PrismJET line of solvent printable media is an ideal compliment to our popular Endura Banner Stands. The new 15oz PET Pop up film offers the benefits of excellent print quality, opacity on a substrate that resists edge curl. Your retail and trade show popup banners will look better than ever.

This exciting new film is made from a 15oz, 16mil, semi-rigid matte construction with a high opacity "blockout" effect for pop up banner stands, hanging banners, and exhibition graphics. The super smooth PVC surface yields high quality, high resolution graphics. The black PET interior layer produces excellent opacity, making this a convenient, two side printable film. To assure you and your customers of safety, it also meets NFPA-701 standard for flame resistance.
